Cancer (Basic comprehensive set. A complete set like this, or rotation of the general cancer sets, or Rife Technology's intensive carcinoma and sarcoma banks are used as Basic sets. Sets listed below for specific types are to be used in addition to basic sets. Also add frequencies determined to be beneficial from scans. Increase run times on frequencies thought to be most

effective as detox allows. Don Tunney now includes E coli 1 frequencies with Resonant Light's intensive regimens. Also use 11,780,000Hz if device is capable. James Bare states that 10025 may be master frequency for cancer in general, 10026 for sarcoma.
